Response to Office Communication Mailed May 19, 2009

## Amendment to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

- 1-9 (cancelled).
- A method of treating fiber materials which comprises 10 (currently amended). applying an aqueous dispersion comprising a composition A combined with a polymer which comprises perfluoroalkyl groups thereto, said composition A being prepared by the following successive steps of:
  - a) reacting a fluorine-free polyfunctional isocyanate mixture comprising about 80-95% by weight of a polymeric isocyanate and about 5-20% by weight 5-25% of an alicyclic isocyanate and wherein each type of isocyanate has at least two free NCO groups per isocyanate molecule with a fluorine-free monohydric alcohol having 10 to 24 carbon atoms or a mixture of such alcohols by using 2 to 10 equivalents of NCO groups per equivalent of OH groups of the alcohol;
  - b) reacting the product obtained in step a) with a ketone oxime in such proportions that there are still free isocyanate groups present in the resultant product mixture; and
  - c) reacting the product mixture obtained in step b) with a fluorine-free organic amine which comprises two or three hydroxyl groups or with a fluorine-free polyhydric alcohol or with a mixture of such compounds in such proportions that the resultant product is free of isocvanate groups.

- The method according to claim 10, wherein one or more of said steps a), 11 (new). b) and c) are carried out in an anhydrous solvent.
- The method according to claim 10, wherein step a) utilizes a polymeric 12 (new). isocyanate which is obtained by reaction of a tolylene diisocyanate with 1,1,1-trimethylolpropane and diethylene glycol and which still comprises on average 2 or more NCO groups in the molecule.
- 13 (new). The method according to claim 10, wherein step b) utilizes 0.2 to 0.7 equivalent of oxime groups per equivalent of free isocyanate groups still present.
- The method according to claim 10, wherein the amine utilized in step c) is 14 (new). N-methyldiethanolamine or triethanolamine or a mixture thereof,
- The method according to claim 10, wherein the aqueous dispersion 15 (new). comprises one or more dispersants.
- 16 (new). The method according to claim 10, wherein the aqueous dispersion comprises at least one cationic dispersant.
- The method according to claim 10, wherein the fiber materials are textile 17 (new). fabrics in the form of wovens, formed-loop knits or nonwovens.
